

Olson Kustom Works

(949)742-0613 Jesse@OKW-Inc.com

Thank you for your purchase from OKW. If you have any questions about your products feel free to call or email!

This Hobbs Switch holder is meant to fit standard style Honeywell Adjustable Hobbs switches that are 1.500" Diameter. If you have a Hobbs that is a different diameter, PLEASE contact us and we will send you a correct size replacement if needed.

There is a link on our web store with the correct part on Amazon.

The PNs that cross reference are 76575-4, M4006-4, and 4D-4785

If you are installing the switch into the holder in a cold environment, it may be necessary to use a hair dryer or heat gun to soften the holder a bit to get the sensor to snap in place. No other glue or hardware is needed to keep it in the holder.
